Lab Objective
- Write your first C++ program
- Submit to Gradescope

This is an INDIVIDUAL assignment. Each student is required to write a hello world program and submit to gradescope.

The program should output the phrase "HELLO CLEMSON". Be sure it is all upper case and nothing else is included in your output.

Make sure your program runs on the virtual desktop environment. Then submit to GradeScope.

ALL programs for this course MUST HAVE the following comments at the TOP OF THE SOURCE CODE FILE.

// My Name: your name goes here
// My Class: CPSC 1021 (for labs) or CPSC 1020 (for lecture class)
// Date: Date you wrote the program
// Desc: brief description of what the program does
// Time: approximate amount of time you spent on this program

Name your source code file hello.cpp

Submit to GradeScope.
